

# Philip John Laxamana

Software Developer

[philip.j.laxamana@gmail.com](mailto:philip.j.laxamana@gmail.com) | [philiplaxamana.com](http://philiplaxamana.com) | [plaxamana](https://github.com/plaxamana) | [plaxamana](https://www.linkedin.com/company/plaxamana) | [\\_plaxamana](https://twitter.com/_plaxamana)

## SKILLS

---

- **Languages:** JavaScript, Java, HTML/CSS, SQL
- **Technologies:** React.js, Redux, Next.js, Node.js, Express, Bootstrap, Tailwindcss
- **Other:** Git, Linux, PostgreSQL, MongoDB, Netlify, Heroku, BEM Methodology, Mac OS, Responsive Web Design

## EXPERIENCE

---

### Software Developer

Co.Lab | You Belong In Tech

February 2021 - April 2021  
Seattle, Washington

- Collaborated cross-functionally in a team with a Product Manager and UX/UI Designer to ship a product in an Agile environment
- Successfully managed strict development timelines by effectively communicating roadblocks early on and providing time estimates for each task
- Built an ed-tech web application that helps increase the efficacy of learning materials. Developed using React, HTML, CSS, JavaScript and deployed it to production using Netlify in 5 weeks. See the source on [GitHub](#). [See Live](#).

### Technical Consultant

Axsium Group

March 2019 - February 2021  
Toronto, Canada

- Developed and deployed high-quality SQL queries and stored procedures used in various reports. Currently being used by 100s Supervisors and Store Managers for a global clothing retailer
- Developed, documented, and modified an existing interface to handle automation of updating 1000s employee records
- Communicated with different Stakeholders, Business Group, and User Group to elicit and analyze Business Requirements before working on the technical solution

### Business Systems Analyst Co-op

Canadian Imperial Bank of Commerce (CIBC)

September 2016 - August 2017  
Toronto, Canada

- Reduced the total number of users by 30% from a business application by conducting an attestation process
- Demonstrated excellent customer service delivering support to end-users by phone and email resulting in a 10% increase in client satisfaction
- Developed Test Cases and performed User Acceptance Testing to ensure quality assurance of the application is met before releasing to production

### Test Analyst Co-op

Canadian Imperial Bank of Commerce (CIBC)

January 2016 - April 2016  
Toronto, Canada

- Stretched myself, taught myself Visual Basic Script and wrote over 5 test scripts for software regression testing
- Communicated and collaborated with teams of 5+ testers
- Developed and automated the creation of 1000's of mock user data for future automation testing

## PROJECTS

---

### GeniusBrain | Face Recognition App

Personal project

February 2020

- Fullstack application built with React, Node, Express, PostgreSQL and Clarifai API. Applied MVC Architecture and RESTful API concepts. See the source on [GitHub](#). See backend source on [GitHub](#).

## EDUCATION

---

### Advanced Diploma, Software Engineering Technology

Centennial College

January 2015 - December 2018  
Toronto, Canada
